THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

Response to Arguments

Applicant's arguments, see "Remarks" pages 9-10, filed 20 May 2008, with respect to claims 1-22 have been fully considered and are persuasive. The rejection of 01 February 2008 has been withdrawn.

Response to Amendment

An "Amendment" was received on 20 May 2008, in response to Office Action of 01 February 2008. Claims 11 and 22 have been cancelled. Claims 7, 10 and 18 have been amended. Claims 1-10 and 12-21 are pending.

Allowable Subject Matter

Claims 1-10 and 12-21 are allowed.

The scanning microscope configuration was not found in a prior art search. The search failed to show or suggest the prior use of:

- A mass spectrometer with an ionization unit, an extraction unit and an analysis unit, wherein the measurement probe has a hollow tip so that the near field of the measurement probe can be used by the ionization unit in such a way that ions are formed only in the near field of the measurement probe, and the shape of the measurement probe allows an essentially axially symmetrical field distribution of the extraction unit with respect to

the axis of the analysis unit in configuration with the limitations of claims 1 and 12.

- Wherein the information from scanning probe microscopy and from mass spectrometry can be compared with high lateral resolution in configuration with the limitations of claims 7 and 18.

The following is an examiner's statement of reasons for allowance:

In regards to claim 1, prior art fails to disclose an apparatus for a scanning microscope, in particular a scanning force microscope, comprising a measurement probe which defines a near field, and having a scanning unit which allows the measurement probe to move relative to a sample in all three spatial directions, in conjunction with a mass spectrometer with an ionization unit, an extraction unit and an analysis unit, wherein the measurement probe has a hollow tip so that the near field of the measurement probe can be used by the ionization unit in such a way that ions are formed only in the near field of the measurement probe, and the shape of the measurement probe allows an essentially axially symmetrical field distribution of the extraction unit with respect to the axis of the analysis unit.

Claims 2-6 are allowed by virtue of their dependencies on the independent claim 1.

In regards to claim 7, prior art fails to disclose a method for high-resolution examination of a measurement sample using a combined scanning probe microscope, in particular a scanning force microscope, wherein the scanning probe microscope is first of all used to record an image of the measurement sample, in particular of the

topography of the measurement sample, and wherein a mass spectrometer is then used for destructive, chemical characterization of at least subareas of sections of the measurement sample which are covered by the image, wherein the information from scanning probe microscopy and from mass spectrometry can be compared with high lateral resolution.

Claims 8-10 are allowed by virtue of their dependencies on the independent claim 7.

In regards to claim 12, prior art fails to disclose an apparatus for a scanning microscope, comprising a measurement probe which defines a near field and a scanning unit which allows the measurement probe to move relative to a sample in all three spatial directions in conjunction with a mass spectrometer with an ionization unit, an extraction unit and an analysis unit, wherein the measurement probe has a hollow tip so that the near field of the measurement probe can be used by the ionization unit such that ions are formed only in the near field of the measurement probe, and a shape of the measurement probe allows an essentially axially symmetrical field distribution of the extraction unit with respect to an axis of the analysis unit.

Claims 13-17 are allowed by virtue of their dependencies on the independent claim 12.

In regards to claim 18, prior art fails to disclose a method for high-resolution examination of a measurement sample using a combined scanning probe microscope, comprising the steps of: using the scanning probe microscope to record an image of the measurement sample; and using a mass spectrometer for destructive, chemical

characterization of at least subareas of sections of the measurement sample which are covered by the image; and further comprising a step of comparing information from the scanning probe microscope and from the mass spectrometer with high lateral resolution.

Claims 19-21 are allowed by virtue of their dependencies on the independent claim 18.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pertinent prior art is closely related art that individually or in combination could be considered grounds for rejection. See references cited for a listing of the pertinent prior art found and the prior art found.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
